PROFILE

Final-year CSE Student (expected graduation November 2026) seeking a Lecturer position in Computer Science and Engineering. Undergraduate Teaching Assistant supporting many students across several core courses, with active research in Human-Computer Interaction and integrated with Computer Vision.

EDUCATION

B.Sc. in Computer Science & Engineering - United International University 2022–2026

CGPA: 3.93/4.00 (Till 11th trimester)

HSC - Dhaka Residential Model College 2018–2020

GPA: 5.00

SSC - Shamshul Haque Khan School and College 2016–2018

GPA: 5.00

TEACHING EXPERIENCE

Undergraduate Teaching Assistant 2023–2026

United International University

- Helped students understand academic problems and technical concepts through practical exercises.
- Supported students in Data Structures and Algorithms, Object-Oriented Programming, Structured Programming Language, and Introduction to Computer Systems.
- Conducted lab sessions, mentored students in programming and debugging, held consultations, and graded lab work and assessments with constructive technical feedback.

Owner & Academic Instructor 2024–Present

Diganta Coaching Center

- Teach students in grades 6–10, explain topics in accessible ways, and encourage them to explore their interests and opportunities to contribute.

RESEARCH INTEREST

- Human-Computer Interaction (HCI)
- Computer Vision
- Quantum Machine Learning

RESEARCH WORKS

Bridging the Gap: Towards Building AI Awareness among Vulnerable Populations 2025-2026

- Investigated awareness and perceptions of AI-generated synthetic media, including multimodal deepfakes, among older adults aged 55+ and younger participants aged 11–18.
- Used participatory design, interviews, and surveys to understand participants' perceptions of deepfake content; trained a model and developed a mobile AI-awareness tool informed by participant data.
- Examined the problem from Computer Vision, Human-Computer Interaction, and Social Computing perspectives.

AI-Assisted Parenting (Qualitative Study ($N = 5$)) 2024

- Studied mental workload, emotional stressors, and trust in AI tools for child development and medical decisions.
- Performed thematic analysis and developed user personas and design guidelines for trustworthy parental AI assistants.

Reproducing and Evaluating Security Mechanisms for the Model Context Protocol 2026

- Re-implemented four MCP security mechanisms (SAMOS, AgentBound, MCPShield, and Breaking the Protocol) on 299 MCP servers.
- Conducted controlled evaluations of information-flow control, capability restrictions, and metadata misalignment detection, reporting a 78.38% detection rate for metadata misalignment.
- Analyzed security vulnerabilities in LLM-agent tool integration and compared reproduced results with reported metrics.

NutriSight: An AI-Powered Multi-Food Recognition and Personalized Nutrition Insight System 2026

- Developed a multi-stage vision pipeline using YOLO26n-Seg, ViT-LSTM, and ViT-Small (Nutrition5k) for multi-food detection and calorie estimation.
- Achieved an F1-score of 0.9007 for custom food recognition and a test MAE of 18.05 for meal-level nutrition estimation.
- Built an Expo mobile app with a FastAPI backend to deliver personalized dietary insights based on user profiles.

Robustness-Efficiency Trade-offs of INT8 Quantization on Edge Devices 2026

- Evaluated clean accuracy and corruption robustness on CIFAR-10-C for FP32, INT8 PTQ, and INT8 QAT models on edge hardware.
- Proposed a degradation-aware PTQ calibration strategy (INT8-RPTQ) to improve noise robustness without full QAT retraining.
- Analyzed hardware performance trade-offs in latency, peak RAM, power consumption, and energy per inference.

PROJECTS

Deepfake Detection System (DeepShield) [\[link\]](#) 2025–2026

Thesis Project

- Developed a video deepfake detection system combining a Swin Transformer and DCT backbone with a Temporal Transformer.
- **Datasets:** Celeb-DF-v2, FaceForensics++_C23.
- **Technologies:** Python, PyTorch, OpenCV.

Jiggasha [\[link\]](#) 2025

Gamified Educational Platform

- Developed an online platform to support exam preparation through a fun, competitive learning experience.
- Implemented a battle-royale-style exam system with live exams and participant rankings.
- **Technologies:** Next.js, Node.js, PostgreSQL.

DiscoverYou [\[link\]](#) 20244

Talent Discovery & Development Platform

- Built a platform for discovering, developing, and showcasing talents through contests, courses, communities, and expert guidance.
- Connected users with job opportunities and a marketplace to monetize their creative work.
- **Technologies:** React, Node.js, MySQL.

Diganta Coaching Center [\[link\]](#) 2025

Coaching Center Website

- Developed a website for my coaching center to facilitate communication between students and teachers.
- **Technology:** Next.js.

CV Banao Mobile App [\[link\]](#) 2026

CV Building App

- Built a dedicated CV builder for academic, research, PhD and higher-study, and industry applications.
- **Technologies:** React Native, TypeScript.

Mini Game Master [link]2024

Multiplayer Game

- Developed a multiplayer game offering a collection of classic mini-games.

AWARDS & SCHOLARSHIPS

Academic Scholarship

- Earned a **100% Full Tuition Waiver** across nine trimesters and a **50% Scholarship** for three trimesters.

UIU CSE Project ShowSummer 2024–Summer 2025

United International University

- Champion**, Database Management System — DiscoverYou.
- Champion**, System Analysis and Design — Jiggasha.
- 2nd Runner-up**, Software Engineering — DiscoverYou Mobile App.
- 3rd Runner-up**, Advanced Object-Oriented Programming — MiniGameMaster.

UIU Juniors Programming Contest2024

1st Runner-up

COMPETITIVE PROGRAMMING

Codeforces	Nahinintesher	270 problems solved
LeetCode	Nahinintesher	41 problems solved

SKILLS

Programming	Python, C, C++, JavaScript, TypeScript
AI / ML	PyTorch, OpenCV
Web Development	Next.js, React, Node.js, Express.js, React Native
Databases	PostgreSQL, MySQL
Tools	Git, GitHub, Linux, Adobe Illustrator
